Profile

Design Systems Designer with 5+ years of experience creating scalable interfaces, components and design foundations. I combine strong UI/visual design with systems thinking, accessibility and frontend collaboration, connecting design decisions with implementation workflows.

I also build personal projects with React and TypeScript to explore design-to-code workflows, component architecture and design tooling.

Experience

Sr Design System Designer

BlueCloud – Affirm | Bogotá | Dec 2025 – Currently

- Defined scalable component structures, including states, variants, and interaction patterns, to support Affirm’s product ecosystem across web and mobile.
- Collaborated closely with engineering to align design tokens, component behavior, and implementation constraints, ensuring consistency between design and production.
- Led UI QA from a system perspective, identifying gaps in states, edge cases, and accessibility, and validating component behavior in real product environments.
- Contributed to design system documentation and adoption, clarifying component usage, behaviors, and implementation considerations for cross-functional teams.

Sr Visual | UI Designer | Design System Designer

Globant | Bogotá | Sep 2021 – Dec 2025

- Established design foundations and a shared component library for an iOS and Android migration, addressing platform inconsistencies such as typography and improving cross-platform consistency by 30%.
- Streamlined communication with stakeholders to establish cohesive visual guidelines, aligning brand principles with product vision.
- Translated concepts into visually compelling designs for products spanning Geo imagery, well-being, and travel.
- Collaborated with front-end engineers to co-create and document design components, accelerating dev handoff by 20%.
- Integrated accessibility standards across product stages, improving consistency and accessibility across interfaces.

UI Designer

Cheil World Wide | Bogotá | Jul 2019 – Sep 2021

- Designed and prototyped a mobile reference tool that replaced a manual printed-card process, helping Samsung workers find product features more efficiently and improving feature usability by 25%.
- Produced high-fidelity wireframes and interactive prototypes for landing products.
- Developed, managed, and maintained design kits and small systems for products.
- Coordinated with UX teams to translate research insights into product interfaces, contributing to a 20% increase in tool engagement.
- Established an efficient communication process with the development team to ensure consistent component and interface implementation.

Education

Meta Front-End Developer

Coursera | 2023

Front-end development fundamentals covering HTML, CSS, JavaScript, React, accessibility and responsive design.

Course of design and marketing of websites.

Universidad Jorge Tadeo Lozano | 2019

Course of branding.

Universidad Jorge Tadeo Lozano | 2016

Graphic Design degree.

Universidad Los Libertadores | 2010 – 2014

Focus on visual communication and digital products.

Skills
